

# Antibody Engineering & Therapeutics

by informa

Asia

20 - 22 October 2025  
Kyoto, Japan

## Connecting the Antibody Community to Advance Discovery, Bispecifics, ADCs and More

Select the right antibody, move faster towards IND, with clinical learnings from real-world case studies on:

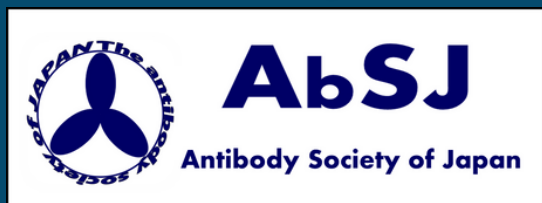

- **Advanced Antibody Engineering** - Bispecifics, novel formats, and alternative scaffolds
- **Therapeutic Applications** - ADCs, immune cell engagers, and challenging disease targets
- **Computational Innovations** - AI/ML models for antibody development
- **Clinical Development** - Case studies and regional considerations

### Key Highlights Include:

- **Presentations** from world-renowned pioneers
- **Workshops** and **poster presentations** showcasing research from peers
- **Networking opportunities** with colleagues from around the globe

**SAVE 10% with code ABSJ10**

**In Partnership With:**
